U.S. ATOMIC ENERGY COM.
DIVISION OF STATE AND LICENSEE RELATIONS

Gentlemen:

EXTRA

Items 1, 2, and 6 of your letter of February 10, 1965, which apply to the Crystal-Solid State Division only of The Harshaw Chemical Company were corrected shortly after Mr. Jim Roy's inspection by establishing the following steps and procedures:

Item 1 was corrected through issuance of Byproduct Material License No. 34-6558-5 which authorizes the quantity of isotopes on hand as well as the past and current use of them.

Item 2 was corrected by establishing a "Receipt and Shipment" log dating from January 1, 1964, which shows source number, isotope, activity, date received, date shipped, manufacturer and serial number, customer and address, customer's license/contract number, for all radioisotopes handled by the Crystal-Solid State Division.

Item 6 was corrected by wipe testing the plutonium-beryllium source and recording the results in microcuries in a "Wipe Test" log. The log dates from January 1, 1965, and contains records of all required wipe tests on radioisotopic sources owned or handled by the Crystal-Solid State Division.

Full compliance with respect to items 1, 2, and 6 was achieved January 1, 1965.

License #34-6558-3 was obtained by Mr. C. E. Hoskins, Manager of our Elyria Plant. Items 3, 4, and 5 of your letter refer to this license, and we have consequently forwarded this information to Mr. Hoskins who will undoubtedly contact you directly.

We shall be happy to supply additional information if required.
