Office of Nuclear Reactor Regulation

SUBJECT: NRR INPUT FOR OMB CIRCULAR A-119 ANNUAL REPORT

The Division of Engineering Technology of RES is currently collecting inputs from the NRC program offices, including all NRR divisions, for the annual report on the status of agency interaction with voluntary standards bodies. The "voluntary standards bodies" as defined in the OMB Circular A-119 are private sector domestic or international organizations- such as nonprofit organizations, industry associations, professional and technical societies, institutes, or groups, and recognized test laboratories- that plan, develop, establish, or coordinate voluntary standards.

To facilitate your preparation, I am attaching John W. Craig's memo to Frank J. Miraglia, dated November 21, 1996, for your use. This is the first year for NRR input to this report. Enclosure 2 to the attached memo identifies the specific information requested by the RES. Please use that form for your response. Codes and standards related to 10 CFR 50.55a need not be reported since they are under the purview of RES. In the context of Item No. 3, "internal standards" are agency provisions such as regulations, regulatory guides, technical specifications, Standard Review Plan, inspection manuals etc..

Rather than forward your inputs to RES, send them to Peter Wen (PGEB/DRPM) who will coordinate this NRR effort (GT 960880). Your response is needed by December 6, 1996. If you or your staff have any questions regarding the requested information, please contact Gilbert Millman (RES) at 415-5843.
