 Docket No. 40-8783

MEMORANDUM FOR: Docket File No. 40-8783

FROM: Sandra L. Wastler, Project Manager
 Licensing Branch 1
 Uranium Recovery Field Office, Region IV

SUBJECT: IN-HOUSE INSPECTION OF DOCKET FILE NO. 40-8783
 FOR THE PERIOD AUGUST, 1984 TO MARCH 31, 1985

In accordance with the requirements of 10 CFR Part 2, URFO has scheduled an on-site inspection of Uranerz, Ruth ISL Facility, Source Material License SUA-1401 for the week of September 16-20, 1985. The entire inspection of this facility is to be completed in two parts. The first part consists of an in-house inspection of the licensing files. The second part consists of the on-site inspection as scheduled above. This memorandum contains the results on the in-house inspection of Docket File 40-8783.

The in-house inspection was conducted August 8 and 9, 1985 and included all documents covering the period August, 1984 through March 31, 1985. The results of the in-house inspection are shown in the attached inspection form where compliance with the license conditions of SUA-1401 are indicated by checkmarks.

The inspection forms should be used as the basis for the on-site inspection where the following areas of compliance to the required license conditions or data supporting compliance should be investigated.

1. The annual ALARA report covering the period of inspection has not been received. Therefore the radiological survey data needed to ascertain compliance with license conditions must be reviewed on-site.

DATE :85/08/14	:	:	:	:	:

2. The on-site inspector should verify that the licensee is retaining all site related data for a period of five years.
3. The on-site inspector should verify that the SOP's are available in the facility work areas.
4. The on-site inspector should verify that the general emergency action plan is available on site.
5. License Condition No. 15 requires that before beginning post restoration monitoring the 11 wells (used to monitor restoration) be sampled and analyzed for a full suite of parameters. The 85-1 quarterly report does not provide this data. The on-site inspector should verify that these samples were taken and analyzed accordingly. The results should be provided in the next quarterly report.
6. The analysis results of monthly sampling of the post-restoration monitoring wells is provided as the monthly average of the 11 wells. The on-site inspector may want to encourage the licensee to provide the data for each individual well.
7. During restoration the licensee was required by License Conditions No. 14 and 16 to obtain a quarterly sample from the monitor wells, stock wells and the north and south Moore wells and analyze the samples for the full suite of parameters. The 84-4 quarterly report did not provide the analysis results for the north Moore well or stock wells. The on-site inspector should verify that these wells were sampled and analyzed as required.
