

AUG 30 1985

Docket No.: 50-382

Mr. R. W. Leddick
Louisiana Power and Light Company
317 Barronne Street, Mail Unit 17
New Orleans, Louisiana 70160

Dear Mr. Leddick:

SUBJECT: VERIFICATION OF CECOR COEFFICIENT METHODOLOGY FOR
APPLICATION TO WATERFORD 3

By letter dated October 24, 1984, you submitted a report on the above subject. The purpose of the report, "Verification of CECOR Coefficient Methodology for Application to Pressurized Water Reactors of the Middle South Utilities System," is to demonstrate the capability of Middle South Services, Inc. (MSS) methodology for generating cycle-dependent data library updates for the CECOR computer program. The report references both Waterford 3 and Arkansas Nuclear One - Unit 2 (ANO-2). Louisiana Power and Light Company requests approval of the report for application to Waterford 3. Arkansas Power and Light Company has already requested and received approval of the report for application to ANO-2.

We have completed our review of the report and find the MSS Methodology acceptable for application to Waterford 3. Our Safety Evaluation is enclosed.

If you have any questions concerning this letter or the enclosed Safety Evaluation, contact J. Wilson, the NRC Project Manager at (301) 492-7702.

Sincerely,

151

Thomas M. Novak, Assistant Director
for Licensing
Division of Licensing

Enclosure:
As stated
