Letter Amendment

I, II

American Potash and Chemical
Company
Rare Earth Division
253 Ann Street
West Chicago, Illinois 60185

Attention: Mr. Gerald J. Sinke
Safety Engineer - R.S.O.

Gentlemen:

This refers to your application for renewal of your AEC Source Material License No. STA-583.

Your initial application for this license was filed over ten years ago and since that time several amendments and renewals have been made to the license. Therefore, we are requesting that a new renewal application complete in itself and, insofar as possible, without reference to previous applications be submitted within ninety (90) days from the date of this letter. We believe the submission of such a consolidated renewal application will enable the Commission staff to evaluate it and subsequent amendments to it more expeditiously. Also, we believe a consolidated application will better facilitate an understanding of the terms and conditions of the license.

The application should be filed using the enclosed Form AEC-2. In lieu of the information requested in Items 9 thru 14 of Form AEC-2, the information requested in the enclosed "Supplemental Sheet" should be provided. We believe it would be to your advantage to submit the information in such a manner so as to provide flexibility in your activities and to minimize the need for license amendments. This can be accomplished by providing the requested information in the form of performance criteria and/or technical specifications whereby changes in equipment, procedures and activities can be made without the need for a license amendment.
