

AUG 29 1985

Docket No. 50-423

Northeast Nuclear Energy Company
ATTN: Mr. J. F. Opeka
Senior Vice President - Nuclear
Engineering and Operations Group
P. O. Box 270
Hartford, Connecticut 06101

Gentlemen:

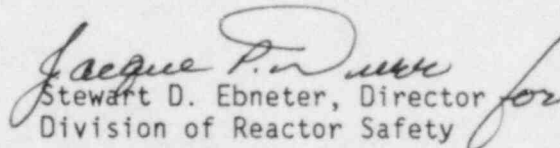

Subject: As-Built Team Inspection by NRC at Millstone Unit 3

This letter is to confirm the NRC Region I intent to perform an As-Built Team Inspection at the Millstone Unit 3 site during the September 9 - 20, 1985 period. These plans were originally discussed by Mr. James T. Wiggins of this office, with Mr. D. O. Nordquist, of your staff, on August 27, 1985.

The inspection will examine the installed conditions of selected fluid, electrical, instrumentation and HVAC systems to verify that these systems implement the design intent reflected in the FSAR. Further details have been provided to Mr. L. Nadeau of your staff. A team of six Region I inspectors and 1 section chief will conduct the inspection.

Your staff will be informed of any significant findings on a daily basis to facilitate resolution or prompt corrective actions. An exit interview will be held on September 20, 1985, and the final report will be issued through our normal correspondence process.

If you have any further questions regarding this planned inspection, contact James T. Wiggins of my staff (215) 337-5198.

Stewart D. Ebnetter, Director
Division of Reactor Safety

cc:

V. Papadopoli, Construction Quality Assurance Supervisor
