Dear Ms. Black:

Subject: Draft of the Proposed Revision 2 of the
Quality Management System (QMS) Document

Please find attached a copy of the proposed Revision 2 to the Westinghouse Energy Systems Business Unit (ESBU) Quality Management System (QMS) document. This Quality (QA) topical report contains the commitments of both 10CFR50, Appendix B and ISO 9001. The primary reason for the revision was to describe the recent changes in the ESBU organization which are contained in Section 1.0, Management Responsibility. Revision 2 contains several other important changes as described below:

1. Section 1.0, which previously included a description of the commitments for ESBU and the Westinghouse Pensacola Plant (WPP), was amended to also include the Process Control Division (PCD) and the Government Technical Services Division (GTSD).
2. Section 1.0 was also modified to include a generic organization description and clarify the duties and responsibilities of the ESBU Quality Systems Director.
3. The QMS was updated throughout, as necessary, to include the requirements of the 1994 revision of ISO 9001. (e.g. Preventive Action - Section 14)

Please provide your comments on the proposed revisions by March 14, 1997.
