Docket No. 030-12926

License No. 37-17534-01

High Steel Structures, Inc.  
ATTN: Richard Hess,  
Radiation Safety Officer  
1911 Old Philadelphia Pike  
Lancaster, Pennsylvania 17602

Gentlemen:

Subject: Inspection No. 85-01

This refers to the routine safety inspection conducted by R. H. Ladun of this office on June 29 and July 1, 1985 of activities authorized by NRC License No. 37-17534-01 and to the discussions of our findings held by R. H. Ladun with yourself at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, measurements made by the inspector, and observations by the inspector.

Within the scope of this inspection, no violations were observed.

As discussed at the exit interview, it appears that a conflict exists between Condition 10 of your license and your approved Operating and Emergency Plan. Specifically, Sections 6.A and 6.E of the Plan indicate that you may engage in radiographic field site activities whereas Condition 10 limits your radiographic activities to your plant site. If you desire to conduct field activities, you must request an amendment to modify Condition 10. Until such a request is received, reviewed, and approved, you are not permitted to engage in radiographic field work.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter will be placed in the Public Document Room.
