Trojan Nuclear Plant  
Docket 50-344  
License NPF-1

Mr. John B. Martin  
Regional Administrator, Region V  
U.S. Nuclear Regulatory Commission  
1450 Maria Lane, Suite 210  
Walnut Creek CA 94596-5368

Dear Mr. Martin:

NRC Communications Installation at Trojan EOF

In response to the letter of June 20, 1985 from F. A. Wenslawski, PGE has prepared cost estimates for the installation of NRC emergency communication circuits in the Trojan Emergency Operations Facility (EOF). The current EOF is located in the auditorium of the Trojan Visitors Information Center (TVIC).

Two options were considered:

Option 1: Supply cabling and connectors as requested, but without conduits. Cables would be free-run from the NRC area in the existing EOF (near auditorium stage) outside through the west door when needed. (See Attachment 1.)

Estimated Cost: \$400

Option 2: Run cabling in conduit from near NRC area along wall to the back of the TVIC auditorium (west side). Connection to the outside will be made through the west door (see Attachment 2).

Estimated Cost: \$750

Page 2

It should be noted that a new EOF is scheduled to be completed by December 31, 1986. The new EOF will be located in an area adjacent to the existing EOF in the TVIC Building. The NRC communications installation in the present EOF will be removed when the new EOF is constructed. A cost estimate was also performed for installation of NRC communications circuits in the new EOF. The circuits would terminate in an external connection on the south side of the building (see Attachment 3). The estimated cost is \$3,340.

In addition, as requested, permission is hereby given for the NRC to utilize the 500-ft meteorological tower on the Trojan site, and the microwave tower on the Rainier microwave/radio site near the Plant for the temporary installation of radio repeaters in the event of an emergency at the Trojan Nuclear Plant.

If you have any further questions concerning NRC communication installations in the Trojan EOF, please contact J. W. Lentsch.

Sincerely,

Bart D. Withers  
Vice President  
Nuclear
