AVAILABILITY NOTICE

Availability of Reference Materials Cited in NRC Publications

Most documents cited in NRC publications will be available from one of the following sources:

1. The NRC Public Document Room, 2120 L Street, NW., Lower Level, Washington, DC 20555-0001
2. The Superintendent of Documents, U.S. Government Printing Office, P. O. Box 37082, Washington, DC 20402-9328
3. The National Technical Information Service, Springfield, VA 22161-0002

Although the listing that follows represents the majority of documents cited in NRC publications, it is not intended to be exhaustive.

Referenced documents available for inspection and copying for a fee from the NRC Public Document Room include NRC correspondence and internal NRC memoranda; NRC bulletins, circulars, information notices, inspection and investigation notices; licensee event reports; vendor reports and correspondence; Commission papers; and applicant and licensee documents and correspondence.

The following documents in the NUREG series are available for purchase from the Government Printing Office: formal NRC staff and contractor reports, NRC-sponsored conference proceedings, international agreement reports, grantee reports, and NRC booklets and brochures. Also available are regulatory guides, NRC regulations in the *Code of Federal Regulations*, and *Nuclear Regulatory Commission Issuances*.

Documents available from the National Technical Information Service include NUREG-series reports and technical reports prepared by other Federal agencies and reports prepared by the Atomic Energy Commission, forerunner agency to the Nuclear Regulatory Commission.

Documents available from public and special technical libraries include all open literature items, such as books, journal articles, and transactions. *Federal Register* notices, Federal and State legislation, and congressional reports can usually be obtained from these libraries.

Documents such as theses, dissertations, foreign reports and translations, and non-NRC conference proceedings are available for purchase from the organization sponsoring the publication cited.

Single copies of NRC draft reports are available free, to the extent of supply, upon written request to the Office of Administration, Distribution and Mail Services Section, U.S. Nuclear Regulatory Commission, Washington DC 20555-0001.

Copies of industry codes and standards used in a substantive manner in the NRC regulatory process are maintained at the NRC Library, Two White Flint North, 11545 Rockville Pike, Rockville, MD 20852-2738, for use by the public. Codes and standards are usually copyrighted and may be purchased from the originating organization or, if they are American National Standards, from the American National Standards Institute, 1430 Broadway, New York, NY 10018-3308.

Historical Data Summary of the Systematic Assessment of Licensee Performance

ABSTRACT

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the SALP assessments for each facility by NRC region and is further divided into two sections. Section 1 presents the most recent SALP report ratings for facilities in operation. Section 2 presents a chronological listing of all SALP report ratings for each operating facility with a final report of August 1988 or later.

Introduction	1
Section 1, SALP Summary: Most Recent Ratings	1-1
Section 2, SALP History: Facilities in Operation	2-1

INTRODUCTION

Organization

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission (NRC). This revision of the summary provides the results of SALP assessments for reports issued during the period January 1, 1994 through September 30, 1996. The results are presented for each facility in two sections and are further divided by NRC region. Section 1 presents the most recent SALP report ratings for facilities in operation. Section 2 presents a chronological listing of all SALP report ratings for each operating facility since August 1988. Earlier revisions of this NUREG contain the SALP ratings prior to August 1988 and for plants under construction.

Background

The SALP program is an integrated NRC staff effort to collect and evaluate observations and data to assess and better understand the reasons for a licensee's performance. The program is described in NRC Management Directive 8.6, "Systematic Assessment of Licensee Performance," which was issued in July 1993. The purpose of the program is to assess licensee performance in selected functional areas. For facilities in operation that have been evaluated since the issuance of Management Directive 8.6 in July 1993, the functional areas include operations (OPS), maintenance (MAINT), engineering (ENG), and plant support (PS). The plant support functional area includes radiological controls, emergency preparedness, and security issues. The program was previously described in NRC Manual Chapter 0516. From June 1988 until July 1993, the functional areas included plant operations (OPS), maintenance/surveillance (MAINT), engineering/technical support (ENG), radiological controls (RADCON), emergency preparedness (EP), security (SEC), and safety assessment/quality verification. In this version of NUREG-1214, the previous separate SALP scores for radiological controls, emergency preparedness, and security are displayed together under the plant support heading in the following order: RADCON/EP/SEC. Prior to June 1988 there were eleven functional areas.

Based on a review of the consolidated information, each functional area is placed into one of three performance categories. A Category 1 rating designates a superior level of safety performance. A Category 2 rating designates a good level of performance. A Category 3 rating designates an acceptable level of performance where NRC will consider increased levels of inspection effort. An "N" indicates that no rating was given for that category because of insufficient information.

It is the policy of the U.S. Nuclear Regulatory Commission to use the SALP process to articulate the agency's observations and insights on the licensee's safety performance. The SALP report communicates those observations and insights to licensee management and the public. The NRC discourages use of SALP data for any purpose other than its intended objectives. Statistical or numerical balancing of data is inappropriate.

Washington, DC 20555 - 0001

9. SPONSORING ORGANIZATION - NAME AND ADDRESS (If NRC, type "Same as above"; if contractor, provide NRC Division, Office or Region, U.S. Nuclear Regulatory Commission, and mailing address.)

Same as above

10. SUPPLEMENTARY NOTES

11. ABSTRACT (200 words or less)

The Historical Data Summary of the Systematic Assessment of Licensee Performance (SALP) is produced periodically by the U.S. Nuclear Regulatory Commission. This summary provides the results of the assessment of each facility by NRC region and is further divided into the following sections: Section 1 presents the most recent SALP report ratings for facilities in operation. Section 2 presents a chronological listing of all SALP report ratings for each operating facility since August 1, 1988.

12. KEY WORDS/DESCRIPTORS (List words or phrases that will assist researchers in locating the report.)

Systematic Assessment of Licensee Performance (SALP)
