Cleveland 6, Ohio

Attention: Mr. Paul H. Mining
Technical Sales - Ceramics

Gentlemen:

Reference is made to your letter of October 8, 1959, requesting information regarding the results of the radiation testing of uranium-containing building materials sent to our New York Operations Office for evaluation. Although radiation measurements have been made using some of the building materials submitted, the experimental portion of the program has not yet been completed, nor has the data obtained to this point been finally evaluated. As soon as we are able to provide definite information to you, we will do so.

Very truly yours,
