**ANFB Application Updates**

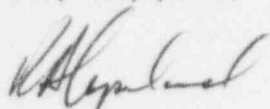

Reference: EMF-1125(P), Supplement 1, Appendix C, "ANFB Critical Power Correlation Application for Co-Resident Fuel," Siemens Power Corporation, November 1995.

During the review of the referenced topical report, there have been several changes to the methodology to incorporate additional conservatism. Attached is a list of revisions of the topical report to update the report to be consistent with the changes that have resulted from the NRC review. We plan to include these updates in the (A) version of the report. Also included in the attachment are two nonproprietary rewrites of paragraphs that were requested by the NRC reviewer.

Some of the information contained in the updates is considered by Siemens Power Corporation to be proprietary. The affidavit enclosed with the original submittal of the topical report satisfies the requirements of 10 CFR 2.790(b) to support withholding of this information from public disclosure.

If you have any questions, or if I can be of additional assistance, please call me at (509) 375-8563.

Very truly yours,

H. D. Curet, Manager  
Product Licensing
