Gentlemen:

DOCKETS 50-266 AND 50-301
TECHNICAL SPECIFICATIONS PAGES
FOR CHANGE REQUEST 170
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

The modified pages for Technical Specifications Change Request (TSCR) 170 are provided as an attachment to this letter. TSCR 170 was submitted in a letter dated February 8, 1996. One supplement to TSCR 170 was submitted in a letter dated August 15, 1996. This TSCR proposes amendments to the Point Beach Technical Specifications Section 15.3.10, "Control Rod and Power Distribution Limits," to improve the clarity of this section. A surveillance is being moved to Section 15.4.1 and a surveillance is being added to Section 15.4.1. Additionally, the guidance contained in the Westinghouse Owner's Group Improved Standard Technical Specifications, NUREG 1431, Revision 0, was used to aid in improving the specifications that were not clear.

The modified pages are being provided to assist in the issuance of these amendments to the PBNP Technical Specifications. If you require additional information, please contact us.

Sincerely,

Bob Link
Vice President
Nuclear Power
