DOCKET 50-312  
RANCHO SECO NUCLEAR GENERATING STATION  
UNIT NO. 1  
JUNE 23, 1985, HIGH POINT VENT LEAK

In a telephone conversation on August 26, 1985, Mssrs. Kulin Desi and Sydney Miner of your staff requested additional information to complete the review of the June 23, 1985, high point vent leak at Rancho Seco.

Attached is NEP 5101.2, Project Classification of Equipment, which defines the alphanumeric system for identifying the classification of equipment. This will clarify the classification on the drawings previously provided for your review. It should also be noted that the design classification was not changed when the high point vent piping was replaced.

If you have any questions, please contact Robert Roehler of my staff at (916) 452-3211, extension 4905.

R. J. RODRIGUEZ  
ASSISTANT GENERAL MANAGER,
