Gentlemen:

This refers to the Systematic Assessment of Licensee Performance (SALP) Board Report of Arkansas Nuclear One, Units 1 and 2. The SALP Board met on August 7, 1985, to evaluate the performance of the subject facility for the period July 1, 1984, through June 30, 1985. The performance analyses and resulting evaluations are documented in the enclosed SALP Board Report.

The performance of your facility was evaluated in the selected functional areas identified in Section IV of the enclosed SALP Board Report.

Overall, we found your performance acceptable and directed toward safe facility operation. Significant improvement has been noted in your performance in the areas of maintenance, surveillance, and radiation protection. Areas needing improvement include design change control, control of written commitments to the NRC, management of the security program, and completeness of Licensee Event Reports.

Unless you specifically request it, a management meeting will not be scheduled for this reporting period. Any request for a management meeting should be made, in writing, within 10 days of receipt of this report.

Any comments you may have regarding our evaluation of the performance of your facility should be submitted to this office within 30 days of issue of the SALP report. Your comments and our disposition of the same will be issued as appendices to the SALP Board Report.

Comments which you may submit are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
