Silver Spring, Maryland 20910

Subject: Proprietary information concerning the topical
report evaluation of the EA-50/FL-50 container.

Dear Mr. Tokar:

As we discussed on the telephone Nuclear Packaging feels that the details of the vent of the EA-50/FL-50 container is proprietary information and is proprietary to Nuclear Packaging. Nuclear Packaging is continuing efforts to legally protect the design of this vent via the patent route. In regards to your evaluation of the container the reference to a porous polyethylene vent or porous polyethylene plug is considered proprietary to Nuclear Packaging. We understand the needs for giving some description of the vent. We recommend that the vent be referred to as pre-meable polymeric material.

If you have further questions please feel free to contact me.

Sincerely,

NUCLEAR PACKAGING, INC.

Charles J. Temus
Technical Director
