Mr. Michael Tokar  
Engineering Branch  
Division of Waste Management  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Tokar:

Nuclear Packaging has reviewed the Technical Evaluation Report transmitted. We appreciate your thorough and timely evaluation.

Our review has indicated only two areas of concern regarding proprietary information. The first area is the reference to a specific corrosion allowance. Nuclear Packaging has expended a considerable amount of time and money in developing the data and logic involved with determining the specific corrosion allowance and corresponding allowable corrosion rate. We request that the non-proprietary version of the TER refers only to a corrosion thickness and allowable corrosion rate but no specific numerical number.

The other proprietary area of concern is the vent. Nuclear Packaging is pursuing a patent protection for it at this time. At this time the details of the vent, material, shape, etc., we request to remain proprietary.

We have enclosed a marked up copy of the TER for your consideration. The suggested revisions will remove the proprietary information from the document. If you have any questions please contact me.

Sincerely,

NUCLEAR PACKAGING, INC.
