

October 16, 1990

NOTE TO: Hugh Thompson
FROM: Jack Heltemes

Enclosed for your information is the report from the CDC to the FRPCC on the use of potassium iodide. Please note that the recommendation to the FRPCC is three-fold: (1) that the guidance need not be changed; (2) that the existing store of KI should be inventoried; and (3) a working group should be established to further address the issue of stockpiling and to make final recommendations regarding the Federal policy.

Jack Heltemes
