RE: Changes to Renewal Application for NRC Material License SMB-920
TAC No. L10014

Dear Mr. Hogg:

As discussed on the telephone on November 21, 1996 with Ms. Chotoo and Mr. Soong and November 26, 1996 with you, please replace Chapter 3 of our license renewal application with the updated version of these pages (attached) and delete Attachment U.

Also, for purposes of analyzing samples for determining airborne radioactivity levels, DAC fractions will be calculated in accordance with 10CFR20 considering progeny and composition of the radiological mixture.

We appreciate your support in the license renewal process.

Sincerely yours,
CABOT PERFORMANCE MATERIALS

Kevin L. Holsopple
