Docket 50-344  
License NPF-1

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington, DC 20555

Dear Sirs:

PGE-1063, "Supplement to Applicant's Environmental Report, Revision 2"

The enclosure to this letter provides Revision 2 to Portland General Electric Company's PGE-1063, "Supplement to Applicant's Environmental Report." The changes modify Section 3, "Decommissioning Plans," to allow the option of removing the reactor vessel and internals as a single component. Included in this change is the approximate schedule for this option. PGE is presently discussing with NRC staff, the feasibility of modifying and licensing the reactor vessel as a Type B package in accordance with 10 CFR 71.

Changes also include removal of reference to the emergency diesel generators as a heat source cooled by the Service Water System.

If you have any questions concerning this matter, please contact Mr. Paul Yundt, of my staff, at (503) 556-7492.

Sincerely,

Stephen M. Quennoz
