Mr. Bruce S. Mallett
Chief, Material Licensing Section
U.S. Nuclear Regulatory Commission, Region III
799 Roosevelt Road
Glen Ellyn, IL 60137

Dear Mr. Mallett:

SCA Chemical Services currently has a Material License (Number 12-20247-01) with the U.S. Nuclear Regulatory Commission to use Ni-63 plated electron capture detectors. Condition 12 of this license requires that the licensed material be used by and under the supervision of certain SCA personnel. SCA wishes to amend condition 12 to update new laboratory employees. The current Lab Manager is Dan Locke. Mr. Locke supervises five chemists: Akhil Desai, Ladislao Garcia, Walter Starrick, Oliver Malcom, and Bruce Marti. We require a copy of the amended license for records purposes. Enclosed is a check in the amount of \$40.00 with this request for amendment.

Please contact me if you need additional information.

Sincerely,

SCA Chemical Services

Robert Bartholomew
