

June 16, 1995

MEMORANDUM TO: J. W. McCormick-Barger, Chief
Decommissioning Section

FROM: W. G. Snell
Senior Radiation Specialist

SUBJECT: TRIP REPORT: SITE VISIT AT ENGELHARD CORPORATION,
JUNE 13, 1995

On June 13, 1995. I visited the Engelhard Corporation site at 1000 Harvard Avenue, Cleveland, Ohio. The purpose of the visit was to familiarize myself with the site prior to review and approval of their Remediation Plan. During the site visit I met with Mr. Andy Kopas, Manager Environmental Services, Engelhard, and Mr. Ted Adams, B. Koh & Associates, Inc., a representative from the contractor who will perform the work. Also joining us was Mr. Frank Talbot, Bureau of Radiological Health Services, Ohio Department of Health.

After a cursory review of the Remediation Plan prior to the site visit, my impression was that overall, it was an acceptable plan. After discussing the proposed remediation and touring the site, the few questions I had from my initial plan review were satisfactorily answered. It appears to be a fairly straight forward remediation, and no surprises are anticipated. The only complicating factor is the fact that the remediation of the Chevron building will be carried out simultaneously. For this reason Engelhard is anxious to conduct their characterization as soon as possible in the unlikely event that work conducted by Chevron were to spread contamination onto the Engelhard site.

I stated I would complete my review as soon as possible, hopefully within a week, and get back to them. I also stated I would be discussing the Plan with the Mr. Talbot from the State of Ohio for any comments or concerns the State may have.
