SUBJECT: NRC INSPECTION REPORT 50-344/97-01; 72-17/97-01 AND NOTICE OF  
VIOLATION

Dear Mr. Quennoz:

An NRC inspection was conducted February 4-6, 1997, at your Trojan Nuclear Plant. The enclosed report presents the scope and results of that inspection.

The inspection covered the work in progress at Trojan related to the decommissioning and dismantlement of the facility. Areas reviewed during this inspection included radiation protection, operations involving your inspection of spent fuel, maintenance of fuel handling equipment, compliance with the Technical Specifications, and Quality Assurance Program implementation. Activities at Trojan appeared to be progressing safely.

Based on the results of this inspection, the NRC has determined that a violation of NRC requirements occurred. The violation is cited in the enclosed Notice of Violation (Notice) and the circumstances surrounding this Technical Specification violation are described in detail in the enclosed report. Your efforts to investigate the missed Technical Specification audit, determine why this violation occurred, and implement corrective actions were prompt and effective.

The NRC has concluded that the information regarding the reason for the violation, the corrective actions taken and planned to correct the violation and to prevent a recurrence, and the date when full compliance was achieved is already adequately addressed in the enclosed inspection report. Therefore, you are not required to respond to this letter unless the description therein does not accurately reflect your corrective actions or your position. In that case, or if you choose to provide additional information, you should follow the instructions specified in the enclosed Notice.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be placed in the NRC Public Document Room.
