Subject: Chevron

Mike,

I just finished talking with Bill Potter from Chevron regarding their Harvard Ave, Cleveland, site cleanup. Thier research into the old AEC contracts has determined that AEC never gave up ownership of the radioactive material. As a result, they are going to go to DOE to see if they can get DOE to pay for disposal, since DOE still owns the material. What Potter wanted from me was the name of someone at DOE, presumably HQ, that he could contact on this issue. Can you give me a name and number (and/or address) that I can pass on to him?

Thanks
B
