Mr. William Snell
United States Nuclear Regulatory Commission
801 Warrenville Road
Lisle, IL 60532

Dear Mr. Snell:

Re: Engelhard Corporation
Harvard-Denison
Area Surrounding Building G-1

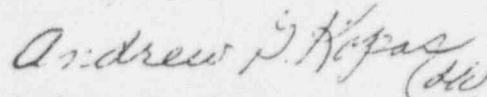

B. Koh & Associates has completed a preliminary assessment of the contamination in pavement/soils surrounding Building G-1. The data will be incorporated in our final report.

Koh has proposed a Phase II Site Characterization Plan which will further delineate the extent of contamination. A copy is attached. Engelhard Corporation has approved the additional work and would like to complete this project before the weather would inhibit our endeavors.

Ted Adams (Koh) will contact you regarding the plan and answer any questions.

If you have any questions of me, please feel free to call at (216) 329-2553.

Sincerely,

Andrew G. Kopas, Manager
Environmental Services
