Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch #2
Division of Licensing
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

License DPR-35
Docket 50-293

Dear Sir:

By letter dated August 9, 1984, Boston Edison (BECO) proposed changes to the containment cooling subsystem Technical Specification 3/4.5B.

Shortly after submitting this, BECO verbally requested that the NRC review be delayed to allow us to amend it based on new information. Assessing that information has indicated that further work is necessary before BECO will resubmit 3/4.5B.

Therefore, BECO herein withdraws our August 9, 1984 proposed change to 3/4.5B.

Should you wish further information on this withdrawal, please contact us.

Very truly yours,
