

Ms. Margaret A. Becker  
Progress Services, Inc.  
4170 Columbia Road  
Medina, OH 44256

February 27, 1997

Dear Ms. Becker:

We have received your letter dated February 20, 1997, in which you requested renewal of your Quality Assurance (QA) Approval for Radioactive Material Packages No. 0630, Revision No. 1. Please note that, with your request, your QA Program Approval is under timely renewal and you may continue your transportation activities in accordance with your current QA program.

At this time, however, for Part 34 licensees, we are not issuing Certificates of Approval for renewal of QA Programs as in the past because the applicable regulations are going to change in the near future. Specifically, 10 CFR Part 34, "Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations," has been revised and will be effective in early 1997. The revised 10 CFR Part 34 will include the requirements for QA activities such as procurement, use, maintenance, and repair of Type B packages (i.e., radiography cameras or overpacks) designed to transport sealed sources used for radiography. The need to apply separately for an NRC QA program approval will no longer be required after the revised 10 CFR Part 34 has been implemented.

There is no need for you to respond to this letter. NRC will contact you when the revised 10 CFR Part 34 has been issued. If you have any questions regarding this letter, you may contact Mr. T. Matula of my staff at (301) 415-8563.

Sincerely,

Original /s/ by:

John P. Jankovich, Chief  
Transportation and Storage Inspection Section  
Spent Fuel Project Office, NMSS
