Young Southern University  
Houston, TEXAS

Subject: REQUEST FOR INSPECTION

Dear Dr. Woods:

Your letter dated February 3, 1958, to the Oak Ridge Institute of Nuclear Studies in Oak Ridge, Tennessee, has been referred to this office for reply.

In response, we would like to inform you, that it is not necessary that hoods be individually inspected prior to the procurement of radioisotopes. However, it is necessary that a Byproduct Material License be obtained before any radioisotopes are used or possessed by your institution. For your convenience in this matter, we are enclosing AEC Form 313, "Application for Byproduct Material License," along with instructions for completing these forms. Since this will be your first request for Byproduct Material License, we suggest that you supply the information requested by these forms in detail. This will enable us to review your facilities, training, and experience in the most expeditious manner.

For your information we are also including Title 10, Code of Federal Regulations, Part 30, "Licensing of Byproduct Material," Title 10, Code of Federal Regulations, Part 20, "Standards for Protection Against Radiation," along with other information material and reference lists that we hope will be of value to you.

If we can be of further assistance, please feel free to contact us.

Very truly yours,

Cecil E. Bushmann, Assistant Chief  
Isotopes Branch  
Division of Licensing and Regulation
