ATTN: Dr. B. S. Mallett

SUBJ: Application for Service License not to include testing

REF: Your letter dated February 27, 1985, Control #17579

Dear Dr. Mallett:

It is apparent that a telephone communication between you and I is impossible.

As stated on our original application of May 23, 1984, this application was only for your office's approval for us to conduct a radiation survey and a wipe test for customers who hold sources and have a license to do so.

In your letter dated February 27, 1985, you stated that our application was for "an NRC License to possess any Ohmart Corp. device which has been evaluated and approved for licensing purposes".

Of the questions asked of us to clarify, I do believe that only #9 applies. This office will only be doing shutter operational checks, radiation checks [with the use of a Geiger counter as stated on form NRC 3131, item #10, line (1)] and a wipe test of the source container, which will be forwarded to the Ohmart Corporation for testing and evaluation.

I hope that this letter will help clarify and make absolutely clear our request. If I can be of any further assistance, please contact the undersigned.

Regards,
