Docket Nos. 50-338
50-339
License Nos. NPF-4
NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT NOS. 1 AND 2
PROPOSED TECHNICAL SPECIFICATION CHANGES

VEPCO letter, Serial NO. 85-228, dated April 12, 1985, submitted a request for amendment, in the form of changes to the Technical Specifications to Operating License Nos. NPF-4 and NPF-7 for the North Anna Power Station Units No. 1 and 2.

The proposed Technical Specification changes are to revise the Limiting Condition for Operation (LCO) and surveillance requirements for the reactor trip bypass breakers, undervoltage trip logic and shunt trip logic. These proposed changes are in accordance with Items 10 and 13 of the NRC review of Item 4.3 of Generic Letter 83-28, dated July 24, 1984.

This submittal modifies the change request to include the subsequent NRC staff's guidance provided in Generic Letter 85-09, "Technical Specifications for Generic Letter 83-28, Item 4.3," for the Limiting Condition of Operation and surveillance requirements for the reactor trip and bypass breakers, undervoltage and shunt trip logic and the manual scram switches. The required modifications to be made for improved reliability of the reactor trip system have not been implemented for North Anna Unit No. 1. These modifications are scheduled to be installed during the next outage of sufficient duration which is expected to begin in November, 1985. The proposed Technical Specification changes for Unit 1 cannot be implemented until the modifications for North Anna Unit No. 1 have been completed. The modifications for North Anna Unit No. 2 have already been implemented.

The supplemental proposed changes to the Technical Specifications for Unit 1 and 2 are included as Enclosure 1 and 2. The safety evaluation is included in Enclosure 3. The proposed changes and the safety evaluation have been reviewed and approved by the Station Nuclear Safety and Operating Committee and the Safety Evaluation and Control staff. It has been determined that this submittal request does not pose a significant

VIRGINIA ELECTRIC AND POWER COMPANY TO Mr. Harold R. Denton

hazard consideration as defined in 10 CFR 50.92 or an unreviewed safety question as defined in 10 CFR 50.59.

Since this information supplements our previous submittal, which included the appropriate application fee, no additional application fee is included.

If you have any questions, or need additional information to process this request, please contact us immediately.

Very truly yours,

W. L. Stewart
