

SEP 06 1985

In Response Refer To:
Docket: 50-482/85-29

Kansas Gas and Electric Company
Attn: Glenn L. Koester
Vice President -Nuclear
P.O. Box 208
Wichita, Kansas 67201

Gentlemen:

This refers to the emergency preparedness followup inspection conducted by Mr. C. A. Hackney of this office during the period June 24-28, 1985, of activities authorized by NRC Operating License NPF-32, for Wolf Creek Generating Station, and to the discussion of our findings with Mr. F. T. Rhodes and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included the followup on emergency preparedness appraisal deficiencies in training, organization, emergency procedures, and emergency response facilities and equipment. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities appeared to deviate from commitments made to the NRC. These items are referenced to the commitments identified in the enclosed Notice of Deviation.

Your corrective actions in response to the deviations were reviewed by the NRC inspector prior to conclusion of the inspection and, therefore, no additional response is required.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
E. H. Johnson
