

SEP 7 1985

Docket No. 50-346

Toledo Edison Company
ATTN: Mr. Joe Williams, Jr.
Vice President
Nuclear
Edison Plaza
300 Madison Avenue
Toledo, OH 43652

Gentlemen:

This refers to the safety inspection conducted by Messrs. W. Rogers, D. Kosloff, D. Butler and N. Choules of this office on June 25 through August 12, 1985, of activities at Davis-Besse Nuclear Power Station authorized by NRC Operating License No. NPF-3 and to the discussions of our findings with Mr. L. Storz at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

This special inspection was conducted in response to the Loss of Feedwater event that occurred at the Davis-Besse plant on June 9, 1985. A significant portion of this report deals with the observation of the licensee's root cause investigation of equipment that appeared not to function correctly during the event.

While no violations of NRC requirements are issued at this time, the NRC concerns identified as "unresolved items" in this inspection report are being reviewed for potential enforcement action. You will be notified in subsequent correspondence as to the resolution of these findings.

In accordance with Section 2.790 of the NRC's "Rules of Practice", Part 2, Title 10, Code of Federal Regulations, a copy of this letter and the enclosures will be placed in the NRC's Public Document Room.
