Mr. Hugh L. Thompson, Jr., Director
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Thompson:

May I please trouble you for a copy of the Safety Evaluation Report and the Environmental Assessment issued on January 14, 1985, by the NRC staff regarding the renewal and extension of the University of Missouri - Rolla research reactor (Facility Operating License No. R-79)? May I also please have a copy of the most recent SER and EA for the University of Missouri - Columbia research reactor as well?

Also, would you please tell me on what date the Nuclear Regulatory Commission voted to extend the UM-R license until the year 1999? And on what date did the Commission vote to extend the UM-C reactor license to the year 2001?

Your response will be appreciated. I would be happy to reimburse you for the above documents.

Sincerely,

Kay Drey
