Re: Catawba Nuclear Station, Unit 2  
Docket No. 50-414  
Significant Deficiency No. 414/85-07

85 SEP 3 P 2:41

Dear Dr. Grace:

My letter of May 23, 1985, regarding this deficiency, stated that the corrective action would be complete by September 1, 1985. The required modifications to the battery racks were to have been implemented concurrently with the reinstallation of the rejarred battery cells. Revised schedules for the testing and shipping of the battery cells necessitate a delay in both of these projects.

All modifications associated with this deficiency will be complete for Catawba Unit 2 by November 1, 1985.

Very truly yours,

*H. B. Tucker*
