

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

JUN 07 1985

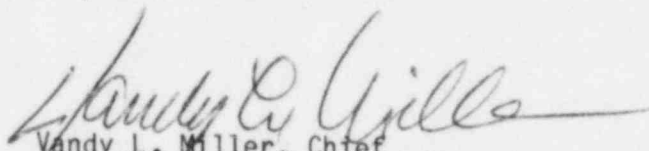

MEMORANDUM FOR: Robert J. Everett, Chief
Nuclear Materials Safety Section, Region IV

FROM: Vandy L. Miller, Chief
Material Licensing Branch
Division of Fuel Cycle and Material Safety

SUBJECT: RENEWAL OF ONSITE WASTE DISPOSAL BY THE UNIVERSITY OF
WYOMING (CN 60030)

A review of the renewal request by the University of Wyoming requesting continued authorization for onsite burials of low-activity radioactive wastes has been completed. Enclosed is the assessment prepared by the Low-Level Waste and Uranium Recovery Projects Branch.

Based on the assessment of potential doses, we recommend the licensee no longer be permitted to dispose of waste by burial in soil. Please note that the enclosure raises the possibility that the licensee might want to submit another proposal. Due to the difficulties that we have encountered in resolving these cases, we recommend against suggesting to the licensee that he submit another proposal.

Vandy L. Miller, Chief
Material Licensing Branch
Division of Fuel Cycle and
Material Safety

Enclosure: As stated
