SUBJECT: COMANCHE PEAK NUCLEAR POWER PLANT, UNITS 1 AND 2 -
NRC INITIAL OPERATOR LICENSING RETAKE EXAMINATION
APPROVAL 05000445/2020301 AND 05000446/2020301

Dear Mr. Peters:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing written re-take examination at Comanche Peak Nuclear Power Plant, Units 1 and 2.

The NRC has completed its review of the operator license applications submitted in connection with this examination and separately provided a list of approved applicants to Mr. Jordon Ruby, Examination and Simulator Supervisor. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the subject examination and hereby authorizes you to administer the written retake examination in accordance with NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," Revision 11, on May 21, 2020. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at 817-200-1159.

Please contact Mr. Clyde Osterholtz, Chief Examiner, at 817-200-1269, if you have any questions or identify any errors or changes in the license level (reactor operator or senior reactor operator) or type of examination (partial or complete written examination) specified for each applicant approved to take the examination.

Sincerely,

Gregory E. Werner, Chief
Operations Branch
Division of Reactor Safety
