ELECTRIC PLANT, DOCKET NOS. 50-325 AND 50-324,  
MEETING NUMBER 20200374

On April 29, 2020, the Nuclear Regulatory Commission (NRC) conducted a live virtual meeting concerning the Shearon Harris Nuclear Power Plant and the Brunswick Steam Electric Plant. The purpose of the meeting was to provide opportunities for the public to discuss the annual assessment for the period of January 1, 2019, through December 31, 2019.

In response to the COVID-19 coronavirus and updated Federal Government guidance on travel and social distancing, the meeting was held remotely through the Skype for Business application. The following documents related to the meeting are available in ADAMS: Meeting Notice (ML20100J150), Assessment Meeting Presentations (Harris - ML20099C999; Brunswick - ML20100G634).

The meeting was conducted from 3:00 PM to 4:00 PM local time. There were 44 attendees, which consisted of representatives from the NRC, Duke Energy, the State of North Carolina and members of the public. Due to the nature of the meeting, no official list of attendees is included. NRC staff were available for questions following each presentation. There was minimal interaction with the public which was consistent with the normal meetings conducted near the station. One member of the public asked for information related to inspection of the steam leak into the drywell of Brunswick Unit 1 in March 2019. In response, the staff provided the ADAMS Accession Number relating to the inspection report (ML19289A011).

The meeting was listed in the Public Meeting Feedback System under Meeting Code 20200374 and as of the date of this memo, there were no public responses to the meeting.
