Engineering Department  
January 12, 1981

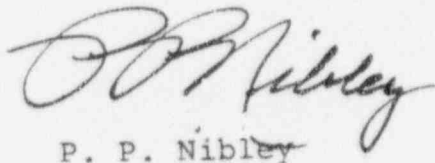

ALL EMPLOYEES  
MOBIL TECHNICAL CENTER

Beginning Tuesday morning, January 13, the east portion of the loop road between the Pennington and the Titus Mill entrances will be opened to traffic. The pavement base course has been installed and is suitable for use. Application of the top course will be completed in the spring as soon as the weather permits.

The sketch on the reverse side illustrates the right of way where the loop road intersects the Pennington and Titus Mill entrance roads. Traffic on the loop road has the right of way at these intersections. Traffic on the Pennington or Titus Mill entrance roads must yield the right of way.

The loop road has been provided for access from one part of the site to another without having to drive through the complex. All Engineering, TSL and Mobil Chemical employees should use the loop road.

While construction is underway at the Titus Mill entrance, it will remain closed to traffic. For safety purposes, please do not attempt to use this entrance. A notice will be issued as soon as the entrance is suitable for traffic.
