Gentlemen:

This refers to the routine safety inspection conducted by Mr. C. C. Thomas of the Los Alamos National Laboratory during the period July 9 and 10, 1985, of activities authorized by NRC Operating License No. R-57 for the Omaha Veterans Administration Medical Center and to the discussion of his findings with members of your staff at the conclusion of the inspection.

Areas examined during the inspection included organization, logs, and records; review and audits; requalification training; procedures; surveillance activities; experiments; fuel-handling activities; radiation control; radwaste management; emergency planning; physical security; and nuclear materials safeguards. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
E. H. Johnson
