

APR 04 1985

NOTE TO: Darrell G. Eisenhut, Dep. Dir., NRR
FROM: Richard H. Vollmer, Dep. Dir., IE
SUBJECT: COMANCHE PEAK U-BOLT SUPPORTS

Per our conversation of April 3, 1985 on a possible material false statement concerning U-bolt supports at Comanche Peak, IE will not take further action pending NRR review of the technical issues. I understand that the licensee is performing additional evaluations of whether the U-bolt support sample was "representative" and "random" and that the results will be reported to NRR. NRR will then make a judgment on the technical correctness of the licensee's representation.
