License No. 21-01354-04
License No. 21-01354-05

30-13899
30-28801

Gentlemen:

This refers to the routine safety inspection conducted by Mr. G. L. Shear of this office on November 14, 1985, of activities authorized by NRC Byproduct Material Licenses No. 21-01354-04 and No. 21-01354-05 and to the discussion of our findings with you and members of your staff at the conclusion of the inspection.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. The inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

In addition to the above areas, we examined the actions described in your letters received February 19 and March 29, 1982, regarding apparent violations found during our December 4, 1981 inspection. We have no further questions regarding these items, with the exception of Violation No. 5. Item No. 5 is a repeat violation and is identified in the attached Appendix as Item No. 1. In your response to this violation, please describe why your proposed corrective action is expected to be more successful in preventing future or similar violations than the corrective action specified in your February 19 and March 29, 1982 letters.

During this inspection, no violations were identified for License No. 21-01354-05; however, violations were identified under License No. 21-01354-04 as specified in the attached Appendix. A written response is required.

The responses directed by this letter and the accompanying Notice (Order) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
