

AUG 21 1985

Docket No. 50-483

Union Electric Company
ATTN: Mr. Donald F. Schnell
Vice President - Nuclear
Post Office Box 149 - Mail Code 400
St. Louis, MO 63166

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. P. C. Lovendale and C. F. Gill of this office during July 16-31, 1985, of activities at Callaway County Nuclear Station authorized by NRC Operating License No. NPF-30 and to the discussion of our findings with Mr. S. E. Miltenberger and others at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, independent measurements, and interviews with personnel.

During this inspection, certain of your activities appeared to be in violation of NRC requirements, as described in the enclosed Appendix. The inspection showed that the actions described in Section 16 of the attached report had been taken to correct the identified violation and to prevent recurrence for Item No. 1. Consequently, no reply to this violation is required and we have no further questions regarding this matter at this time. If our description of your corrective actions is incorrect, please notify this office in writing. A written response is required for violation Items No. 2 and 3.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC's Public Document Room.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.
