

22 AUG 1985

Docket No. 50-412

Duquesne Light Company  
ATTN: Mr. J. J. Carey  
Vice President  
Nuclear Group  
Post Office Box 4  
Shippingport, Pennsylvania 15077

Gentlemen:

Subject: 10 CFR 50.55(f) Quality Assurance Program Description Change Review  
Beaver Valley Power Station Unit No. 2

Reference: Duquesne Light Company (DLC) letter 2 NRC-5-085 to USNRC dated  
June 4, 1985

We have received the above referenced letter which documented changes to the Beaver Valley Power Station Unit No. 2 Quality Assurance Program description, in accordance with the requirements of 10 CFR 50.55(f). These changes reflect a proposed reorganization at the Duquesne Light Company to accomodate the shift in activities due to the near completion of Unit 2 construction and the initiation of the operational phase activities, such as, system turnovers and preoperational tests. Region I staff has reviewed and found the proposed reorganization to be acceptable, as it did not reduce the commitments in the Quality Assurance Program previously accepted by the NRC.

The effectiveness of your QA program implementation will continue to be the subject of future routine NRC inspections.

If you have any questions concerning the above, please contact Mr. Madan Dev at (215) 337-5328.

Sincerely,

Original Signed By:

Stewart D. Ebnetter, Director  
Division of Reactor Safety
