Mr. J. A. Tiernan
Vice President - Nuclear Energy
Baltimore Gas & Electric Company
P. O. Box 1475
Baltimore, Maryland 21203

Dear Mr. Tiernan:

On November 1, 1983, the NRC issued Generic Letter (GL) 83-37 which contained guidance concerning Technical Specifications (TS) for a number of action items described in NUREG-0737, "Clarification of TMI Action Plan Requirements", November 1980. One such item involved TS for the reactor coolant system (RCS) high point vents.

On December 22, 1983 you responded, in part, to GL 83-37 and provided alternative TS for the RCS high point vents. The enclosed Draft Safety Evaluation compares the GL 83-37 TS and your proposed alternative TS for the RCS high point vents. We believe that the best way to resolve the open items in this issue would be to hold a meeting. In this regard, the enclosed Draft Safety Evaluation should be considered an agenda for the meeting.

Accordingly, within fifteen (15) days following receipt of this letter, please contact the NRC Project Manager for Calvert Cliffs, Mr. D. H. Jaffe (301-492-8140), to arrange a mutually agreeable date for this meeting.

Sincerely,

/S/

Ashok C. Thadani, Director
PWR Project Directorate #8
Division of PWR Licensing-B
