U.S. Nuclear Regulatory Commission
Region III
Material Licensing Section
799 Roosevelt Road
Glen Ellyn, IL 60137

Dear Sir:

This letter is to request renewal of our material license. Please note that there were no changes made in personnel, equipment, radiation safety procedures, nor procurement of byproduct nuclear medicine material was made under the current license.

The only change made under the current license was the relocation of our lab and classroom from room # 101 in the "Science Building" to room # 102 in the "Business Building".

I have enclosed two copies of the diagram of the new lab and classroom. I have also enclosed a new lab survey sheet. This should replace the old file for the renewal of our new license.

Please note that an exemption of the renewal fee is to be applied to our educational institution under Code of Federal Regulation Title 10, Chapter 1, Part 170.11.

Sincerely,

William P. McKanna
