November 8, 1983

Mr. B. J. Holt
Materials Licensing Section
United States
Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

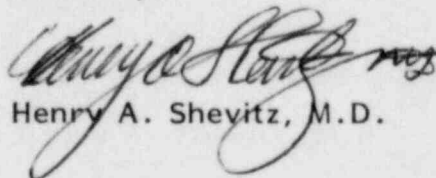

Dear Mr. Holt:

In response to your letter of September 5, 1983 concerning control No 14963 the following information is submitted:

1. Radioactive materials were used for only a short time at 22401 Foster Winter Dr., Southfield, MI. A closeout-survey as required will be performed with the results retained on file with the records at the new location.
2. A drawing of the new location is attached.
3. The clinic is locked when not in use. Materials may only be delivered when the clinic is open and the technologist is on sight.
4. Please change the name from Argon Medical Clinic to ION Laboratory, Ltd.
5. Please amend license for use of an end-window type survey for use when checking wipe tests. See attached sheet.
6. Please amend license for use of the Cali-check linearity check system, see attached sheet.

If there are any questions please contact me or my consultant Mr. Ray Carlson (313) 494-7364.

Sincerely,

Henry A. Shevitz, M.D.
