

Doclet No. 50-341

APR 15 1974

The Detroit Edison Company  
ATTN: Mr. C. M. Heidel  
Vice President  
Engineering and Construction  
2000 Second Avenue  
Detroit, Michigan 48226

Gentlemen:

The Regulatory staff has completed the review of the blasting monitoring data supplied by your letter EF2 - 21,955. This additional data confirms the decision that continuous monitoring of the wells at the south end of the Fermi site during blasting is not required.

Sincerely,

A handwritten signature, likely of G. W. Knighton, is written in ink.

G. W. Knighton, Chief  
Environmental Projects Branch 1  
Directorate of Licensing
