

JAN 14 1986

Docket No. 50-320

GPU Nuclear Corporation
ATTN: Mr. F. Standerfer
Director of TMI-2
P. O. Box 480
Middletown, Pennsylvania 17057

Gentlemen:

Subject: Inspection 50-320/85-13

This refers to the inspection conducted by this office between July 31, 1985 and October 31, 1985, at Three Mile Island Unit 2 (TMI-2), and the discussions of our findings held by Mr. N. Dudley of the NRC staff with Mr. R. Maag of your staff. This effort was conducted to evaluate the adequacy of the requalification program to certify presently licensed Senior Reactor Operators (SRO) to directly supervise defueling.

The present evaluation consisted of a review of the training and examinations conducted during the Licensed Operator 1985 Requalification Training Program. The scope and content of our evaluation is discussed in the enclosed report.

Based on the results of this effort, it was determined that presently licensed SROs had received adequate training and evaluation to allow them to perform those duties involving direct supervision of the defueling of TMI-2. However, a problem was identified regarding whether the training department will be able to identify the rapidly evolving changes to procedures and equipment, and disseminate that information in a timely manner. This item will be the subject of further discussions between yourselves and the Program Office regarding how changes will be identified and how operators will be informed of these changes.

Within the scope of this inspection, no violations were observed.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
