 Docket No. 40-8783

MEMORANDUM FOR: Docket File No. 40-8783

FROM: Gary R. Konwinski, Project Manager
 Licensing Branch 2
 Uranium Recovery Field Office, RIV

SUBJECT: MEETING MINUTES - DECEMBER 5, 1985
 MEETING BETWEEN URANERZ, U.S.A., INC. (UUS),
 WYOMING DEPARTMENT OF ENVIRONMENTAL QUALITY (WDEQ),
 WYOMING STATE ENGINEERS OFFICE (SEO) AND NRC

PARTICIPANTS: George Hartman, UUS
 K. Gary Somerville, UUS
 Jim Finley, WDEQ, Land Quality, Cheyenne
 Tim Holbrook, WDEQ, Water Quality, Cheyenne
 Tony Mancini, WDEQ, Water Quality, Cheyenne
 Rick Chancellor, WDEQ, Land Quality, Cheyenne
 Glenn Mooney, WDEQ, Land Quality, Sheridan
 Bill Kearney, WDEQ, Land Quality, Cheyenne
 Mike Penz, SEO, Cheyenne
 Harry Pettengill, USNRC, Denver
 Gary Konwinski, USNRC, Denver

At the request of UUS, a meeting was held in Cheyenne, Wyoming to discuss the restoration and stabilization efforts which have been completed to date on the Ruth R&D, ISL Project. Both the WDEQ and the NRC had completed preliminary reviews of the Ruth ISL Project Final REstoration Report, dated October 11, 1985. The independent reviews reached a joint conclusion that all ground water parameters had been reduced to levels consistent with premining water quality values with the exception of radium. The data indicates that radium concentrations, based upon a well field average, have been rising over the period of stabilization monitoring (January 1985 to November 1985). Although the values have been on the rise, they do not show a statistical difference over the

period of record. UUS was made aware of the concern over radium values and further informed that the data indicates that successful restoration of the well field had apparently taken place. However, it was concluded that UUS should fulfill the 12 month stabilization monitoring commitment and submit the results of their December 1985 well field monitoring. Based upon these results, the NRC and WDEQ will finalize their reviews and take appropriate licensing actions.
