Materials Licensing Branch  
Division of Fuel Cycle and Material Safety  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Gentlemen:

Reference is made to Albany Research Center Byproduct Material License No. 36-01142-02. Radioactive materials covered by this license are no longer needed. Since the Center will be unable to dispose of these materials before the June 30, 1983, expiration date of this license, a license renewal FOR STORAGE ONLY is requested.

The unneeded material the Center is currently holding is listed in the enclosed license application. Disposal of the material will be on a bid contract basis. Until the contract is let, the materials will be stored in a locked facility. You will be informed as to the scheduling of shipment as soon as it can be arranged.

The enclosed license application has been reviewed by this office and appears to meet the rules and regulations contained in Title 10, Code of Federal Regulations.

Sincerely,

Glenn C. Pritchard  
Chief, Safety Management Staff
